

HiGlutaXL™ Minimum Essential Medium Eagle

With Hank's salts, L-Alanyl-L-Glutamine and Sodium bicarbonate
1X Liquid Cell Culture Medium

Product Code: AL056G

Product Description :

HiGlutaXL™ medium contains the stabilised dipeptide form of L-glutamine, L-alanyl-L-glutamine. HiGlutaXL™ medium offers several advantages over the conventional glutamine containing media. Dipeptide form prevents the intramolecular cyclization reaction, thus preventing toxic build-up of ammonia. L-alanyl-L-glutamine incorporates L-alanine that protects the alpha amino acid group. Aminopeptidases within the cell break the dipeptide, gradually releasing both L-glutamine and L-alanine for use by the cell. The gradual release of L-glutamine obviates the need to supplement L-glutamine frequently and allows liquid media to be stored at 4°C for longer periods.

AL056G is HiGlutaXL™ Minimum Essential Medium with L-alanyl-L-glutamine, Hank's balanced salts and sodium bicarbonate. Hank's salt mixture is designed to equilibrate with air, hence does not require CO₂ air mixture. Cells can therefore be grown in AL056G in less CO₂ or CO₂ free environment. Users are advised to review the literature for recommendations regarding medium supplementation and physiological growth requirements specific for different cell lines.
