Antibiotics Assay Medium No. 38

Antibiotic Assay Medium No. 38 is used for the microbiological assay of Ticarcillin, using *Pseudomonas aeruginosa* as the test organism.

**Composition**

</tbody>
</table>

**Formula adjusted, standardized to suit performance parameters**

**Directions**

Suspend 45.4 grams in 1000 ml purified/distilled water. Heat to boiling to dissolve the medium completely. Sterilize by autoclaving at 15 lbs pressure (121°C) for 15 minutes.

**Principle And Interpretation**

This medium follows the specification of CFR (1) and is routinely employed for agar diffusion assay of Ticarcillin using Gram negative test organisms specially *Pseudomonas aeruginosa*. This medium is used as both base agar and seed agar for assay of Ticarcillin.

Peptic digest of animal tissue and papaic digest of soyabean meal provides essential nutrients and growth factors for the growth of test organisms. Dextrose serves as carbon source. Sodium chloride maintains the osmotic equilibrium. L-cystine and sodium sulphite are sulphur providers that aid assimilation of sulphur during microbial growth. L-cystine also acts as growth stimulator and enrich the medium with amino acid source for promoting the growth. The high nutritional content along with high sulphur (cystine and sodium sulphite) content improves growth with chromogenicity of test organism *Psuedomonas*.

Freshly prepared plates should be used for antibiotic assays. Test organisms are inoculated in sterile seed agar pre-cooled to 40-45°C and spread evenly over the surface of solidified base agar.

**Quality Control**

**Appearance**
Cream to yellow homogeneous free flowing powder

**Gelling**
Firm, comparable with 1.5% Agar gel

**Colour and Clarity of prepared medium**
Yellow coloured clear to slightly opalescent gel forms in Petri plates.

**Reaction**
Reaction of 4.54% w/v aqueous solution at 25°C. pH: 7.0±0.2

**pH**
6.80-7.20

**Cultural Response**
M799: Cultural characteristics observed after an incubation at 35-37°C for 18-24 hours.

Please refer disclaimer Overleaf.
**Pseudomonas aeruginosa** 50-100 luxuriant >=70% Ticarcillin

**ATCC 29336**

**Storage and Shelf Life**
Store below 30°C in tightly closed container and use freshly prepared medium. Use before expiry date on the label
