MBT104-20µg  Listeria monocytogenes Genomic DNA

HiMedia’s Listeria monocytogenes Genomic DNA is an ultrapure DNA extracted from *Listeria monocytogenes*. It is used as positive control in *in vitro* diagnostics techniques based on nucleic acid amplification. The vial contains up to 20µg of the purified DNA.

Upon receipt, the product should be stored at -70°C for long-term storage. When using the product, it is recommended that the DNA should be stored in aliquots at -20°C. The product is stable for up to 30 months.

**Quality Control:**
Functionally tested in amplification.
