Nasco Sampling Bags (Whirl Pak) PW152, PW153, PW388, PW389 PW390 & PW391.

These are transparent, non-toxic and sterilized plastic sampling bags, suitable for liquid or solid samples. They provide an easy to use leakproof closure for collection of a wide variety of sample materials.

For homogenizer blenders. The resins used in the extrusion of film for Whirl Pack are approved for food contact by FDA and USDA. Makes sample testing easier and more efficient.

Application: Perfect for general laboratory use in the storage and transport of liquid and solid samples.

Direction for Use:
1. Label the bag with sample information if necessary
2. Tear off top of bag along perforation.
3. Use pull tabs to open bag.
4. Place sample in bag not more than 2 inch (5.1cm) from the top.
5. Hold bag by wire ends and whirl three times or more to close.
6. Or, fold the tab over tightly three times to close.
7. Bend wire ends onto bag.

Note: Capacity is measured with fluid when the bag is closed and tab is folded over three times. Volume, dimensions and thickness are approximate; bags should not be used at temperatures above 82° C. Bags can be frozen to any temperature, even liquid nitrogen - careful handling required after freezing. All bags are sterilized after manufacturing.

Please refer disclaimer Overleaf
Product Features:
- Great for sample collection and storage.
- The white, write-on strip makes sample identification easier and more convenient.
- Leakproof Closure.
- Puncture proof Tabs
- Sterile.
- Unbreakable sample container
- Whirl-Pak® bags save 90% more space than other types of containers.
- Valuable space savings in the lab, vehicle, warehouse, etc.
- Significant savings on shipping costs
- Easy disposal after use.
- Pack Size : 1 X 100 Nos.
