Dulbecco's Phosphate Buffered Saline 1X
With 1000mg/L Glucose, 36mg Sodium pyruvate per litre, Calcium chloride, Magnesium sulphate, 50mg Streptomycin sulphate per litre, 100mg Kanamycin sulphate per litre
Without Phenol red

Product Code: TL1123

Product Description:
All media used in tissue culture have a basis of a synthetic mixture of inorganic salts known as a physiological or balanced salt solution (BSS). All the physiological salt solutions have been derived from the salt solution originally described by Sydney Ringer (1885). The first balanced salt solution to be developed specifically for supporting the metabolism of mammalian cells was Tyrode's solution. Since then many modifications have been done to obtain better buffering salt solutions and to prevent calcium precipitation.

The function of a salt solution is:
- To maintain the medium within physiological pH range.
- To maintain intracellular and extra cellular osmotic balance.
- Modified with a carbohydrate, such as glucose serves as an energy source for cell metabolism.

TL1123 is 1X Dulbecco's Phosphate Buffered Saline with 1000mg per litre D-glucose, 36mg per litre sodium pyruvate, calcium chloride, magnesium sulphate, 50mg per litre streptomycin sulphate, 100mg per litre kanamycin sulphate. It does not contain phenol red. It is frequently used with primary cells, where contamination risk is high.

Composition:

<table>
<thead>
<tr>
<th>Ingredients</th>

</table>

Sodium chloride 8000.000

OTHERS
D - Glucose 1000.000
Kanamycin sulphate 100.000
Sodium pyruvate 36.000
Streptomycin sulphate 50.000

Quality Control:

Appearance
Colorless, clear solution

pH
6.90 - 7.50

Osmolality in mOsm/Kg H2O
300.00 - 340.00

Sterility
No bacterial or fungal growth is observed after 14 days of incubation, as per USP specification.

Toxicity test
Passes

Endotoxin content
NMT 1EU/ml

Storage and Shelf Life:
Store at 2-8°C away from bright light.
Shelf life is 24 months.
Use before expiry date given on the product label.
