

## Sterile Cotton Swabs

**PW003, PW005, PW009,  
PW041, PW1136 &  
PW1184**

Proper collection and transportation of specimen whether in clinical or non-clinical setting are vital for correct recovery and identification of microorganisms. Sterile cotton swabs on wooden shafts may be used for collection of specimens under aseptic technique. Cotton swabs will allow absorption of material and maintenance of viability for short time limits depending on maintenance condition. Such swabs may therefore be used for preparation of smears, microscopic observation using wet mount technique.

Swabs may also be used for culture provided specimens are processed immediately.

**Applications:** For collection of specimens from nasal, throat, genitalia, medication applicator, for wound dressing, cleaning and cell collection.

Product Name	Product Code	Description	Size (mm)	Packing (Nos)
<b>Sterile Cotton Swabs</b>	<b>PW003</b>	In screw capped polypropylene tube, cotton bud with polypropylene stick. Individually Packed.	75.0 X 12.0	1 X 100
