

Thumb Press Dispensing Dropper / pasture Pipette Plastic **PW136, PW1144, PW1145, PW1201, PW1206, PW1212**

Thumb Press Dispensing Dropper / pasture Pipette : Plastic Droppers /pipettes made from non-toxic polyethylene plastic. They are semi transparent and have gradations that continue down into the tips. Graduation ranges from 1.00 ml and can easily dispense 1 drop at a time.

These dispensing droppers /pipettes have a top where the user holds his thumb over the top to create the vacuum and seal the liquid in the Dropper / pipette. Blow-out dispensing droppers / pipettes, allow you to blow into this open end to get the last bits of liquid in the droppers / pipette into your receiving container, for greater accuracy.

Blow-out Dispensing droppers / pipettes are clearly marked with a frosted thin rings around the neck.

How It works :

- Hold the dispensing dropper / pipette with Pipette Tips vertically at eye level after you have drawn up your liquid.
- Find the level of the liquid inside the dispensing dropper / pipette. The surface of the liquid will look as though it curves. This is called a “meniscus curve”.
- Find the measurement line that meets the bottom of the meniscus curve.
- Count up the number of lines from the nearest whole number below the bottom of your meniscus curve. Record your reading with the appropriate units.

Application: Use in plant tissue culture work, Molecular Biology work, Laboratories, Universities and other Industries .
