

Dulbecco's Phosphate Buffered Saline with Gentamicin

With 120µg/ml Gentamicin sulphate

Without Calcium, Magnesium and Phenol red

Contains 20ml DPBS in a 50ml self-standing centrifuge tube

Product Code: TL1145

Product Description:

All media used in tissue culture have a basis of a synthetic mixture of inorganic salts known as a physiological or balanced salt solution (BSS). All the physiological salt solutions have been derived from the salt solution originally described by Sydney Ringer (1885). The first balanced salt solution to be developed specifically for supporting the metabolism of mammalian cells was Tyrode's solution. Since then many modifications have been done to obtain better buffering salt solutions and to prevent calcium precipitation.

The function of a salt solution is:

- To maintain the medium within physiological pH range.
- To maintain intracellular and extra cellular osmotic balance.
- Modified with a carbohydrate, such as glucose serves as an energy source for cell metabolism.

TL1145 is 1X Dulbecco's Phosphate Buffered Saline without calcium, magnesium and phenol red. It contains 120µg per ml of Gentamicin sulphate.

Composition :

Ingredients	mg/L
INORGANIC SALTS	
Disodium hydrogen phosphate	1150.000
Potassium chloride	200.000
Potassium dihydrogen orthophosphate	200.000
Sodium chloride	8000.000
Gentamicin sulphate	120.000

Quality Control:

Appearance

Colorless, clear solution

pH

7.20 -7.80

Osmolality in mOsm/Kg H₂O

265.00 -305.00

Sterility

No bacterial or fungal growth is observed after 14 days of incubation, as per USP specification.

Toxicity test

Passes

Endotoxin Content

NMT 1EU/ml

Packaging:

20ml medium is filled in a 50ml self-standing centrifuge tube made of polypropylene.

Storage and Shelf Life:

Store at 2-8°C away from bright light. Do not freeze.

Freezing results in irreversible precipitation of certain components.

Shelf life is 12 months.

Use before expiry date given on the product label.

Revision: 02 /2019
