

**WT023                      Octo Aqua Test Kit****Product Number    Packing**

WT023    :    1NO

**Product Information**Product Code    :    WT023  
Product Name     :    Octo Aqua Test Kit  
Shelf Life     :    1 years**Technical Specification**Description     :    A compact flexible carry case with PP buffer to hold all the liquid reagent bottles and other items properly. A Booklet that describes the methods for determination of all the test parameters as well as interpretation of results. 19 reagent bottles, 1 Marked Glass Test jar (with spoon), 4 standard Turbidity vials and 1 sample vial, Spoons for  
Results     :    The kit is designed for the Testing of common 8 test parameters of water sample  
pH     :    pH test strips of range 2.0 - 10.5 - Visual type of test  
Turbidity     :    Standards of 0, 5, 10 & 25 NTU - Visual comparison type of test  
Chloride     :    10-200mg/L (ppm) and 50-1000mg/L (ppm) as Cl - Drop titration type of test  
Total Hardness     :    25-600 mg/L (ppm) as CaCO<sub>3</sub> - Drop titration type of test  
Fluoride     :    0.0 - 2.5 mg/L(ppm) as F - Colour Comparator type of test  
Nitrate     :    0.0-100 mg/L(ppm) as Nitrate (NO<sub>3</sub>)-N - Colour Comparator type of test  
Iron     :    0.0-2.0 mg/L(ppm) as Fe - Colour Comparator type of test  
Residual (Free) chlorine                                 :    0.0-3.0 mg/L(ppm) - Drop titration type of test  
Use     :    Kit comprising of 100 tests as per parameter, Simple, easy and rapid Testing of water sample. Most economical , Can be performed even outside the laboratory, Suitable for large scale as well as household use.**Risk and Safety Information**

Storage Temperature(°C)                                 :    Store below 30°C

**Transport Information**ADR/RID     :    Not Dangerous Goods  
IMDG     :    Not Dangerous Goods  
IATA     :    Not Dangerous Goods
